

The City of Windsor is continuing to develop the Sewer and Coastal Flood Protection Master Plan project, which has been initiated to address basement, surface and coastal flooding across the City. To date measures to reduce the risks and impacts of flooding have been developed and are ready for public review and input.

Your participation in the master plan process will improve the results and help us create a comprehensive plan that can be implemented in partnership with the community. Consultation is an integral part of this process and members of the public, agencies, Indigenous communities and other interested persons are encouraged to participate in the master planning process and attend the PIC.

These Public Information Centre (PIC) meetings will focus on the following:

- Findings of our analysis, showing where flood risks are greatest;
- Proposed short-term solutions and long-term solutions, including:
 - Private property solutions that rely on cooperation from residents and property owners to implement; and
 - Improvements to municipal infrastructure such as pump stations, sewers, stormwater management ponds, and treatment plants;
- Implementation Plan and Next steps

These PIC meetings are being held at three separate dates, times and locations for your convenience:

February 11, 2020
5pm - 8pm
Roseland Golf & Curling Club
455 Kennedy Dr. W

February 12, 2020
3pm - 8pm
WFCU Centre
Second Floor
8787 McHugh St.

February 13, 2020
5pm - 8pm
Windsor International Aquatic and Training Centre
401 Pitt St. W

This study is being carried out in accordance with the Master Plan Approach No. 2 of the Municipal Class Environmental Assessment (EA) (Municipal Engineers Association, 2015) process. This study will fulfill EA requirements for Schedule B projects and satisfy Phases 1 and 2 of the process for Schedule C projects.
