Executive Summary

Skyline Real Estate Holdings Inc. (“the Owner”) owns three properties totalling 4.4 hectares (10.9 acres) situated southeast of the Tecumseh Road/Southfield Drive intersection. The subject lands are subject to site plan control approval in accordance with Section 41 of the *Planning Act, R.S.O. 1990*. A residential development comprising two four-storey, 71-unit apartment buildings totalling 142 dwelling units along with associated parking, landscaping and on-site services/works is proposed for the vacant southerly 1.71 hectare (4.22 acre) property which fronts the east side of Southfield Drive (1200-1250 Southfield Drive). A summary of previous planning approvals for the subject lands, details and an evaluation of the proposed development and other improvements, along with a final recommendation on the proposed site plan control applications are provided in this Report.

Background

Property Location

Skyline Real Estate Holdings Inc. (“the Owner”) owns three properties totalling 4.4 hectares (10.9 acres) situated southeast of the Tecumseh Road/Southfield Drive intersection. The two properties that front on Tecumseh Road (11837 and 11917 Tecumseh Road) contain existing apartment buildings and associated parking/landscaped areas. The vacant southerly 1.71 hectare (4.22 acre) property, which fronts on the east side of Southfield Drive (1200-1250 Southfield Drive), is the site of the current development proposal (see Attachment 1).

Previous Planning Application Approvals

In March of 2020, Council adopted by-laws having the effect of amending the Tecumseh Official Plan and Tecumseh Zoning By-law 1746 to recognize the existing two residential apartment buildings and to facilitate the development of the southerly 1.71 hectare (4.22 acre) vacant parcel for one four-storey apartment building. At that time, the new residential building comprised two four-storey towers connected by an attached single story building that was intended as an amenity area. The Official Plan Amendment (OPA No. 42), which introduced site-specific policies within the “Residential” designation, was subsequently approved by the County of Essex (the Approval Authority for Official Plan Amendments).

The Zoning By-law amendment established site-specific zoning regulations pertaining to the maximum number of dwelling units, building heights and other lot requirements related to building setbacks and parking requirements.

Subsequent to these approvals, the Owner applied for consent to sever the subject lands into three separate lots such that the two existing apartment buildings and associated parking areas were on individual lots and the vacant development land to the south was on a separate lot. In addition, the applications sought to have easements created providing mutual access across the three lots. These applications were approved by the Committee of Adjustment, resulting in the current lotting configuration (see Attachment 1). In August 2020, the Owner applied for a minor variance (Application A-12-20) requesting relief to permit the separation of the proposed single four-storey apartment building into two four-storey, 71-unit apartment buildings totalling 142 dwelling units. The Committee of Adjustment granted the minor variance application and that combined with the severances facilitated the development proposed through the subject site plan control applications.

Proposed Development

The Owner has now filed an application for site plan control approval in order to:

- i) Recognize the existing two apartment buildings on the lots located at 11873 and 11917 Tecumseh Road and facilitate driveway and parking area improvements on these sites; and
- ii) Facilitate the development of two four-storey, 71-unit apartment buildings totalling 142 residential dwelling units and associated parking, landscaping and on-site services/works on the southerly 1.71 hectare (4.22 acre) vacant parcel of land situated on the east side of Southfield Drive, immediately east and north of Southfield Park (1200-1250 Southfield Drive).

The above-noted properties are subject to site plan control in accordance with Section 41 of the *Planning Act, R.S.O. 1990*.

Given there are three separate lots comprising the subject lands, three site plan control agreements have been prepared. Two agreements apply to the existing apartment buildings on the properties that front on Tecumseh Road. These agreements contain provisions related to access improvements to be undertaken on each of these existing properties. More specifically, the westerly driveway access to Tecumseh Road for each of the existing apartment building properties will be eliminated in accordance with the recommendations of the Traffic Impact Study (TIS) that was prepared as part of the Official Plan/Zoning By-law Amendment approval process. In addition to the removal of these driveways, improvements to the remaining access driveways and interconnection points with the new development property are being completed to better facilitate on-site traffic movements (see Attachment 2).

The third agreement pertains to the proposed residential development on the southerly vacant property on the east side of Southfield Drive. Specifically, the proposed site plan drawing and architectural renderings (see Attachments 2 and 3) depict:

- i) Two four-storey apartment buildings totalling 142 dwelling units (71-units each). One of the proposed apartment buildings extends along the northern lot line of

Southfield Park while the other extends along the eastern lot line of Southfield Park. A one-storey amenity building is situated between the apartment buildings but is attached to, and has interior access from, the westerly apartment building only;

- ii) An outdoor amenity that includes a BBQ area with seating, raised garden beds, an electric fire place/bonfire area and an outdoor dog run area to the south of the amenity building. The originally proposed pickle ball courts are no longer being contemplated;
- iii) An asphalted parking area accommodating 193 parking spaces (six of which are to be barrier-free), loading areas and electrical vehicle charging stations, including infrastructure to provide proper stormwater drainage. The new parking area occupies the northern and eastern portion of the property with direct access through a new driveway on Southfield Drive. It can also be accessed via Tecumseh Road through the mutual access lanes that interconnect the proposed development with the parking areas and driveways serving the existing apartment buildings to the north. It should also be noted that all three site plan agreements include a clause regarding joint use and reciprocal access for the mutual movement of vehicles and pedestrians across all three properties;
- iv) A new asphalt trail connecting the easterly terminus of Arbour Street (within the parcel of land that the Owner gratuitously conveyed to the Town) that will replace the existing trail that currently links Arbour Street to Southfield Park. The new trail will be wider and shifted north of the existing trail to provide an enhanced buffer area between it and the abutting residential lot to the south. This issue was identified at the public meeting associated with the previous Official Plan and Zoning By-law amendment applications. The design of the trail was completed in consultation with Parks & Recreation Services; and
- v) Multiple pedestrian sidewalk connections through the properties to Tecumseh Road and to Southfield Road.

In addition to the site plan, the Owner has submitted a site service plan, a landscape plan, a lot grading plan, elevation plans and a photometric plan, all of which are attached to the site plan agreement as schedules. It should be noted that the landscape plan identifies extensive new landscaping throughout the property, particularly along the lot lines that abut Southfield Park. In addition, new tree plantings are proposed along the entirety of the Owner's landholdings adjacent to the east side of Southfield Drive. The existing chain link fence along this perimeter is also proposed to be removed. These changes will result in an improved streetscape along this portion of Southfield Road and the trees will have the effect of creating "friction", which can act as a traffic calming measure. These site enhancements were discussed at the public meeting associated with the Official Plan and Zoning By-law amendment applications.

Comments

Official Plan and Zoning

The proposed development depicted in the corresponding site plan conforms to the site-specific policies contained in the Official Plan and complies with all regulations established in the “Residential Zone 3 (R3-16), (R3-17) and (R3-18)” (see Attachment 4) that apply to the entire land holdings.

Servicing

The proposed development will be on full municipal services (sanitary, water and stormwater drainage). A Stormwater Management Study and associated site service drawings, which include quantity and quality control measures, have been reviewed by Town Administration. As a result, revisions are currently being finalized by the Owner’s consultant. The site plan control agreements require that final approval of the Stormwater Management Study and associated servicing drawings, to the satisfaction of the Town, shall be required prior to the issuance of a building permit. Public Works and Environmental Services has advised that it has no concerns with the proposed development.

Community Improvement Plan (CIP)

The subject property is located within the Tecumseh Road Main Street Community Improvement Plan (CIP) area. The proposed development is consistent with the CIP objectives, particularly as they relate to residential intensification and the fulfilment of urban design guidelines. In addition, the architectural drawings provided by the Owner depict a building that is consistent with the architectural building features and materials promoted through the CIP. The Owner has applied for funding through the Development Charges Grant Fund program of the CIP in the amount of \$100,000 and has also applied for property tax relief based upon the incremental increase in the municipal portion of property tax through the Building and Property Improvement Grant (BPIG) Program. Council approval of the Development Charges Grant Fund program of the CIP is being brought forward concurrently with this site plan control application by way of PBS-2021-03. The Building and Property Improvement Grant (BPIG) Program CIP application will be brought forward at an upcoming Council meeting.

Summary

In summary, it is the opinion of the writer, along with Town Administration, that the proposed site plan control agreements will result in appropriate development that is based on sound land use planning principles. The development of the proposed two four-storey, 71-unit apartment, along with other proposed residential intensification developments in the surrounding area, will help to realize the community-developed vision articulated in the Tecumseh Road Main Street CIP while adding to the housing-mix of the community.

Town Administration has reviewed the three proposed site plan agreements and is prepared to recommend approval of the documents and the attached drawings. Wolf Hooker Law Firm (Town Solicitor) has drafted the three agreements (see Attachments 5, 6 and 7, with site plan drawing attached thereto as Schedule "B" to each) which facilitates the subject development. As has been the practice of the Town to date, the agreement establishes that a security deposit in the amount of \$20,000 (cash or letter of credit) is required as a condition of approval to ensure all performance obligations of the Owner are fulfilled.
