Subject: Trail Extension

I understand the trail extension will be discussed today. I am in total support of extending the trail. I do believe the North side of the road would be best as the sidewalk already exists and only has to be upgraded. No streets to contend with and it takes you right into the park. No matter what side you choose get it done. So far our elected officials have been silent and we only have the views of opposing sides. We elect our councillors to make decisions on our behalf. They seem to be worried about negative feedback from a few citizens more than doing what should be done for everyone to enjoy.
