Subject- Riverside Trail Extension

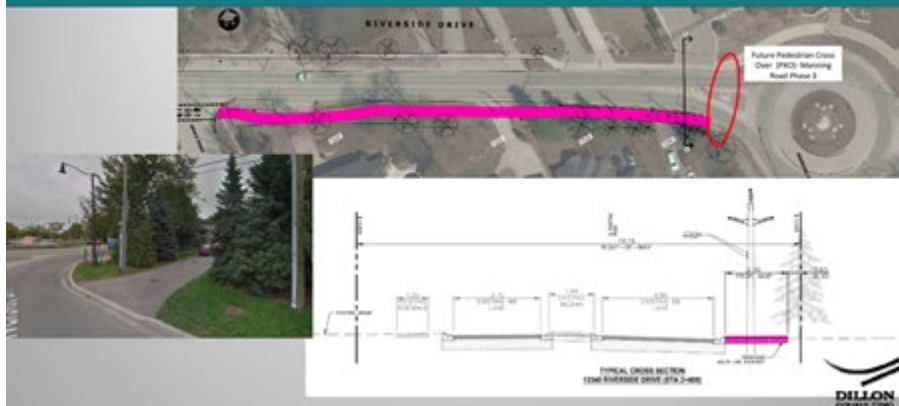

Good evening, I live at Riverside Drive and have since 1995. It is a joy to live here, and we enjoy countless hours riding, running and walking along Riverside and Lakewood Park.

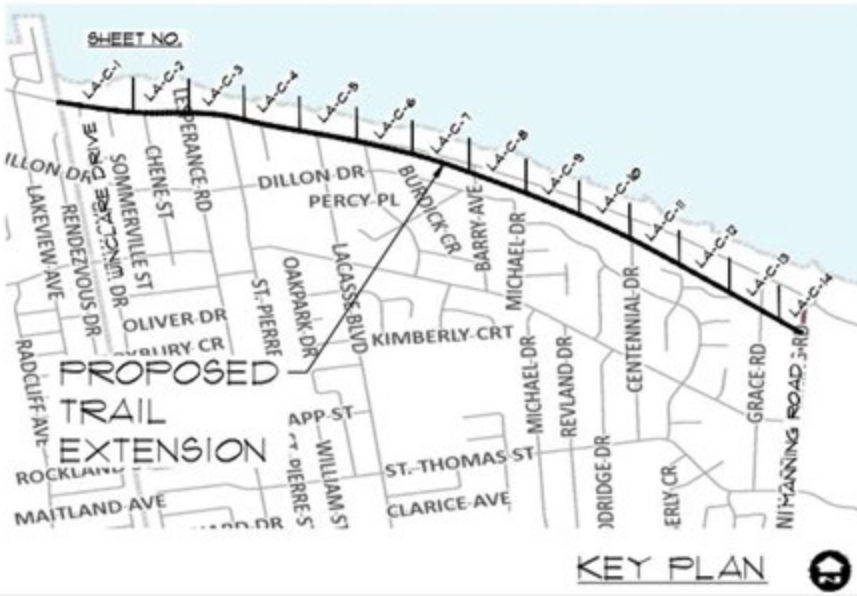

I voiced concern regarding this project at the original meeting and have spoken with Andrew Dowie to reiterate my thoughts. I recently spoke on CKLW to share real experiences from this last weekend including two children almost being run over in the roundabout and then being berated by the driver. Two cars later raced around the roundabout at high speeds. Unfortunately these types of occurrences are not uncommon. I have also witnessed cars going the wrong way, picture attached. Has the council or any other party conducted a traffic study at the roundabout to determine what the traffic volume is during peak hours? Has a traffic study included Saturday morning through to Sunday evening? If not, as a community how can we possibly consider encouraging more youth, seniors and families to cross it? The traffic volume and potential dangers need to be studied before we can responsibly encourage more people to cross at the roundabout.

I would also ask to physically see where the trail will lie. I have reviewed all of the drawings and there is simply not space. How do you plan to address this? The actual trail needs to be marked before people on either side of the issue can factually understand what council is planning, how it will function and what the consequences are.

Special Consideration – Various

BP Bespoke Partners Planning, Landscape Architects	PROJECT: GANATCHIO TRAIL EXTENSION	CLIENT: Tecumseh	DRAWING TITLE: TRAIL LOCATION CONCEPT PLAN	DATE: JULY 2017 SCALE: 1:500 # 1 x 17 1:250 # 22 x 34 DRAWN BY: PL, GDS	SHEET: 1A-C-14 OF 14
---	--	----------------------------	--	---	-----------------------------------

Unfortunately, I will not be able to speak at tomorrow's meeting, but I have raised two serious concerns that have not been answered or resolved.

I request that a traffic study be conducted at the roundabout as well as a physical mapping of the actual placement of the trail on the actual land it is proposed to cross.

I can be reached at the phone or email below.

I look forward to hearing the results of the meeting and hope my concerns are shared with all concerned.

Best regards,
Scott Cameron
