

Alycia Semmema

Trail meeting.

I'd like to know what the plan for proper upkeep on any trail that goes through Tecumseh will be. The current trail (located for about 3 blocks just into Tecumseh) has NEVER been properly maintained. It is almost unusable for actual runners, cyclists and bladders. As an avid trail user (FTR I avoid the trail and sidewalks in Tecumseh due to their ill repair) I'm interested what, if any, tax increases are planned to extend the trail and maintenance involved over the upcoming years. I'm also curious what the plan is for driveways if placed along RSD. Will there be "stop signs" at every driveway as there is on the Windsor side? I would also much appreciate someone coming out and showing individual homeowners exactly what will be impacted on the front of the property as I've seen about 5 different maps all indicating something different. I lived along the trail for 15+ years in Windsor, while there were benefits to that there were also drawbacks such as homeowners not picking up after their animals. Will there be Town of Tecumseh enforcement to ensure dog feces is removed? What is the plan then with waste bins? These can become quite the smell-fest if not emptied multiple times per week (especially in the summer).
