**Subject:** FW: Notice of Meeting to Consider - McLean Hergott Drain

Hi Jennifer/Dana

Please see the attached, ERCA's acceptance related to their concern below, please include the attached report page as an addendum to the Engineers Report on the Report to Council if not approved yet, and/or the agenda for the meeting on Oct 12, 2021 for the McLean Hergott Drain.

Thanks,

Sam Paglia, P.Eng.

Good morning Ashley:

Thank you for your email below and clarification on the requirements for this drainage report. We have added to the first paragraph on page 5 outlining how the design does not affect the level of service of the drain or any impacts upstream or downstream. Please see the attached modified page and let us know if this addresses the initial comments and feedback from ERCA. If it is found satisfactory, the Town will be able to substitute this page into the drainage report and ask Council to adopt the report with this modified page.

Thank you for your time and attention to this. We appreciate your help in getting the report completed to satisfy all requirements. Please let us know if you have any questions or further concerns or comments. We look forward to hearing from you.

Regards,

Gerard Rood, P.Eng.

Hi Gerard,

Further to Sam's email below, the final report does not have to include the culvert analysis or calculations. It is sufficient if the final report confirms in writing that the design of the culvert addresses the below specified comments.

Please note that our office is closed on Monday; however, I will make every effort to provide comments prior to the meeting time on Tuesday.

Kind regards,

ASHLEY GYORI

Hi Ashley,

Please find a copy of the report attached.

Gerard,

Please see that the concerns below are addressed ASAP.

If we cannot satisfy the technical aspects of the report prior to the Consideration, administration's position will be to send the report back to the Engineer. On October 12, 2021 meeting to consider.

Regards,

Sam Paglia, P.Eng.

**Subject:** Notice of Meeting to Consider - McLean Hergott Drain

Good morning Sam,

On October 5<sup>th</sup>, 2021, we received the mailed copy of the Engineer's Report for the McLean Hergott Drain and the Notice of Meeting to Consider. We note that the report was filed by the engineer on August 25<sup>th</sup>, 2021. In our previous correspondence below, our office requested that we be provided with the opportunity to review the report prior to the report being brought before council so that any ERCA concerns or comments can be addressed ahead of time. We note that the meeting date is scheduled for October 12, 2021. As such, we will not be able to provide a response prior to Tuesday.

Additionally, the mailed copy appears to have portions of the drawings cut off. Please provide a digital copy so that a full review can be undertaken. Based on a preliminary review of the text of the drainage report, the report does not address the initial comments made on April 22<sup>nd</sup>, 2021, asking that the report confirm that the proposed works do not result in any adverse impacts to the level of service of the drain and that there are no negative impacts upstream or downstream. Prior to issuing an approval, the final report must accurately reflect the comments provided.

If you have any questions, please do not hesitate to contact this office.

Kind regards,

ASHLEY GYORI
