Town of Tecumseh

Dear Ms Moy

I have a point to table re the subject application

A few years back the Town of Tecumseh held public meetings backed by engineering reports submitted the Essex Region Conservation Authority visualizing several feet of water at the corner of Chene and Dillon. The cause was due *to* elevated lake levels, climate change and other factors. Residents were placing sand bags and installing check valves to avoid possible flooding. What is ERCAS current position on this phenomena?

Also can I please have a formal decision on this application?

Pete Hradowy
