Re: Quote for Mobile Patrol Service

Dear Miss Denise,

As requested, we've put together a quote for Paladin Security's mobile patrol services tailored to the needs of the Town of Tecumseh and its BIA. Our conversation highlighted your desire to enhance security visibility in the town and the importance of a security vehicle with a clear identity.

We are pleased to present the following pricing details after carefully considering the information provided and in line with our agreement on patrol areas. Each patrol visit, lasting approximately 30 minutes, is priced at **\$60.00 before taxes**. This coverage includes the journey between the plaza and critical streets in Tecumseh. If you wish to adjust these routes to better suit your requirements, we're more than willing to accommodate them. We can tailor the frequency of patrols to ensure comprehensive coverage throughout the day.

In addition to the patrol services, our proposal includes using a marked security vehicle proudly displaying our company's emblem. Our skilled security officer will be on board, trained to maintain safety and security. To help you manage these activities, we offer the TrackTik reporting system. This tool enables you to track patrol routes and access reports, aiding in building a valuable database of security-related information. Our services are available 24/7 to cater to your needs.

Please refer to the attached document for a more in-depth understanding of the TrackTik reporting system.

**Paladin Security**

Please connect with me if our proposed pricing structure aligns with your budget and needs. We can discuss the details further and work towards a mutually beneficial agreement. Please let me know if you have any specific preferences or require further customization. Our team is here to assist you.

Thank you for considering Paladin Security. We look forward to the possibility of collaborating with you.

Best regards,

**The Paladin Security Management Team**
