Subject:	Fluoridation
Date:	December 12, 2018 11:17:04 PM

To Whom It May Concern,

We are glad the city stopped adding fluoridation chemicals to the drinking water. However we do not consent to fluoridation chemicals being added to our drinking water. We get enough fluoride from our toothpaste and don't want or need it in our drinking water. Council is not our doctor or dentist and shouldn't be prescribing tooth medicine in our water without knowing anything about our oral or physical health. Fluoride, if needed, should be administered and monitored by a dental professional. We would also like our email included in correspondence to council.

Sincerely Residents of Windsor
