Subject: Fluoridation of water is concerning
Date: December 08, 2018 10:24:17 PM

My name is Lindsey Ecker and I live at [REDACTED] in Kingsville Ontario.

I am a teacher and a mother of two boys who have digestive issues and other health concerns.

I do not approve of fluoride being added to water. The only time fluoride should ever be administered is by a dentist if there is a specific need and no risk present.

Please contact me if you would like to discuss this further.
