Subject: Flouride - water

Date: December 13, 2018 3:28:12 AM

Importance: High

Hi everyone. I have been a resident of Tecumseh since march of 1997 & was glad to see when the mayor signed the water sharing agreement with Windsor & happy when they decided to use ozone in their treating system. I was even happier when the fluoride was removed & want all of you to know that we should continue to keep this unsafe chemical **out of the water**. If you have any questions please feel free to message me or for an even quicker response please phone or text at [REDACTED]

Thanks & God bless J

Mike Denunzio
