Subject: Flouride

We wish to add our opinion to the Flouride debate ; we definitely vote no .

If the statistics show increased percentage of dental decay in the population then that issue should be addressed with greater access to dental care for all , increased education and support on the importance of good nutrition pre and post natal and into adult hood and increased education re the importance of teeth hygiene.

The cost of adding flouride , reversing and the system maintaining the system is unacceptable . please keep chemicals out of our drinking water .

Thank you for the opportunity to give input , we hope our council votes no .

Linda and Steve Martin
