TOWN OF TECUMSEH

917 Lesperance Road

Tecumseh, Ontario N8N 1W9

To: Director Corporate Services & Clerk for the Town of Tecumseh

Dear Laura Moy

My name is Launa McGraw, I am formerly requesting an audience with the city council to discuss my concerns for the fluorination of the public drinking supply at the Special meeting scheduled on January 29, 2019 at 6 P.M... I would like to discuss the impact that Fluoride will have upon the water supply.

I will discuss the harmful effects that fluoride has upon young children and mothers, point out the fact that our water supply is already contaminated with drugs, confirm that fluoride is a neurotoxin that adversely effects brain development of the unborn and young children. I will discuss information which confirms added fluoride to the drinking water is harmful to populations that are at risk; like the elderly, immune compromised and share available research that shows that dental and skeletal problems are interconnected with fluoride. Lastly, I will show that fluoride is more effective and safer when applied topically.

Mass fluoridation of public drinking water is not the answer to prevent tooth decay. I am not fluoride deficient and you do not have my consent.

Sincerely,

Launa McGraw
