**Subject:** Fluoridation

Hello,

I am writing to express my concern with fluoridation of public water. I believe that it is unnecessary and unhealthy to ingest fluoride in the drinking water. If people are concerned with the wellness of their dental health, they should be able to choose to use fluoride toothpaste which is a much safer, superficial usage of fluoride.

Please consider this email as an objection to the addition of fluoride to public drinking water.

Thank you,  
Jordan Scott
