Subject: Floride

Please do not add Floride to the water system. It's costly and research shows it's not a great solution, It's more harmful than good. Please put that money into educational programs or helping the homeless or single mothers. I can't afford a system to remove the things I dont want to drink out of my water. Again the people with money can be okay and us poor folk suffer.

Thank you for your time
Ashley Jenkins
