Subject: fluoridation in our water

I was glad when Windsor and Tecumseh voted to end fluoridation 5 years ago. Municipal councillors should not be prescribing tooth medicine to my family when you have no idea how much fluoride we get elsewhere or what our individual health needs are.

I just simply do not feel it is right to put unwanted chemicals in our water forcing us to drink fluoride without our permission. There is absolutely no evidence, and I mean legit evidence that the pros outweigh the cons. When in doubt, keep it out.
